And against the Number 5 l. you shall find 4 s. 6 d. So that the Interest of 100 and 5 l. for 9 Months, cometh to 4 l. 14 s. 6 d. The same is all the rest.

In Gardning never this Rule forget,  
To sow dry, and set wet.

The use of Physick becomes now seasonable, as also Purgings and Bloodletting. It is good to abstain from Wine, for many Diseases will be taken thereby to the ruine of many.

This Month the Pores of the Body are open, and apt to receive Physick; therefore this is the best time to remove and prevent causes of sickness, or for speedy remedy in extremity; Pray to God for a Blessing.

 to strew your Floors, to destroy  
 Fleas. At the Full Moon gather  
 Flowers and Seeds, dry your Flo-  
 wers rather in the shade, than in  
 the Sun, which too much exha-  
 leth their Virtue ; but to avoid  
 Corruption, let the Suns heat a  
 little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this Month, and produce pestilential diseases. Forbear superfluous drinking, but eat heartily; use cold herbs and meats, abstain from Physick. Now the Rivers are more wholesome than the Baths. In time of Pestilence keep your Chamber Windows shut till the Sun have force of shining. Perfume your Chamber every Morning with Tar, upon a Chafing-dish of Coals. Use *Cardus Benedictus* boiled, and drink fasting.

Now with thankfulness reap your desired Harvest; sow Winter-Herbs in the New of the Moon. Esteem fair Weather as precious, and mispend it not. Gather Garden-seeds near the Full. Use moderate Diet, forbear to sleep presently after meat. Take heed of sudden cold after heat.

Beware of Physick and Blood-letting in the Dog-days, if the Air be hot; otherwise, if occasion require, you may safely make use thereof. Now moderate Diet is best. Beware of Surfeits, Heats and Colds, for Pleurisies are engendred thereby. Use not to sleep much, especially in the afternoon, for that brings oppilations, headach, Agues and Catharrs, and all notorious Disorders of the same kind. Red Wine and Claret are excellent Remedies for Children against the Worms.

## A Description of the Four Quarters of the Year

**T**He *Spring* begins this Year on *March 9*, at 2 h. 43 m. after Noon, at which time the *Sun* enters (to appearance) the *Equinoctial Sign Aries*, causing an equality of Day and Night all the habitable World over. *Summer* takes beginning *June 10*, at 18 min. past 3 after Noon, the *Sun* then approaches our *Zenith*, and enters the first Scruple of the *Tropical Sign Cancer*, making the longest Days with us, and the shortest Nights. *Autumn*, or *Harvest Quarter*, begins *September 12*, at 4 in the morning, then the *Sun* touches the first Scruple of the *Equinoctial Sign Libra*, again equalizing both Day and Night. Lastly, *Winter* begins *December 10*, 27 min. past 6 at night; the *Sun* then touches the first Point of the *Tropical Sign Capricorn*, making the shortest Day and longest Night in the Year on this side the *Equator*, as also the longest Day and shortest Night to them who inhabit the *Southern* part of the World.

## Of Eclipses that happen this year 1696

**F**our times this Year will the LUMINARIES be Eclipsed, viz twice the *Sun*, and as often the *Moon*, but only those of the *Moon* visible in our Horizon. The first will be on the 6<sup>th</sup> day of *May* near Midnight. The second falls on the 30<sup>th</sup> of *October*, near 4 in the Morning, both totally darkned with continuance worth Observation, and may be seen with us if the Air be clear. And upon the 14<sup>th</sup> of *December* there will be a famous Conjunction of the Planets *Saturn* and *Mars* in *Capricorn*, which may have notable signification.
